

Why
Redo
Residency

Various Challenges :

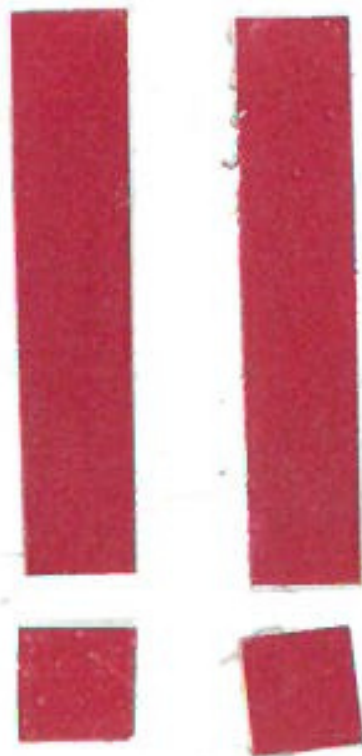

- Licensing & Certification :
Lengthly, costly, more exams,
& training.
- Language Proficiency.
- Cultural Differences :
Different healthcare practice,
& patient expectations.
- Limited Network Opportunities :
Building a professional network
- Credential Recognition :

Even though
we have
extensive
medical
experience in
home country.
It may not
be
recognized
in Canada.

- Do **not** compare us
with new graduated
doctors.

- **18** years ^{of} experience
is not **enough**!

Why should we
wait years for
residency training?

Is that *fair* to be
seperated
from our
family

Our family needs
support. We have
to return to our
home country to
practice our profession.

Experienced **P**hysicians

NO Canada

Will **L**ose **Y**our
